The tyranny of the mask MUST end. Masks DO NOT prevent the spread of SARS-Cov-2. If they did, previous mask mandates would have been effective. Additionally, the cloth masks and surgical type masks the VAST majority of people are using do not filter down small enough to prevent the virus from getting the rough them. Even the vaunted KN95 mask allows particles LARGER than the virus to pass through even when properly fitted, which most are not. The only masking that would truly work is a high level containment suit with its own breathing apparatus. Masks collect particles other than the virus, dirt, bacteria and all manner things that are contributing to other illnesses in children and adults alike. If you think these measures are effective, you're either delusional or ignorant of the facts. The reason there was a dip in cases in the summer and an increase now is because people were outside, getting fresh air, sunlight and vitamin D. Florida, which does not require masks, has the lowest transmission rate in the entire nation. If your premise were correct, all Floridians would be sick. They're not. Lastly, the Omicron variant is a nothing burger with extremely mild symptoms and a very short duration. As an added bonus, it provides natural immunity post infection. Add that to the high vaccine rates in Maryland and you have an entire population with high levels of immunity. I understand your mad desire to hold power but you seem to have forgotten you work for US, the People. We put you in those seats of power and can just as easily

remove you come the next election. So, instead of cowering in fear, grasping at your waning power, trying to assert control over your constituents, you must listen to them. The cry to end the masks is overwhelming. Do not prolong this folderol. End it. End it now.
