The county hasn't based their current position on reliable data, hasn't been consistent with application of responses during the pandemic and hasn't been transparent with citizens of this county. The board of health has done NOTHING during the entire pandemic to address the key comorbidity that accounts for a majority of deaths FROM COVID; obesity. It's hard to reliably claim that masks reduce COVID deaths when without accounting for obesity, the death rate from COVID is less than 0.05%. Case rates aren't an accurate metric as time and again, we see holes in data. I have severe asthma and can't wear a mask. Please let me keep my freedom of choice and do not penalize small businesses that allow me to.
