Masks can be worn voluntarily if someone so chooses. There is no such thing as a one-way mask, nor a mask that only works if others are also wearing them. If in fact they work, what is there to fear? See attached file w.r.t. their effectiveness. Plus, a critical load must exist first for a pathogen to be pathogenic. This is why healthy people must be left alone to face the virus and develop natural immunity with symptoms that keep them at home, versus taking a vaccine that only suppresses symptoms making them the actual asymptomatic carriers. Dr. Peter McCullough at <https://youtu.be/GukloZ8d3Ew> <https://zachbushmd.com/innate-immune-system/> <https://zachbushmd.com/knowledge-virome/> "Fear of the virus is more dangerous than the virus itself?" Mattias Desmet, psychologist, University of Ghent, Belgium. Many scientists and physicians, experts in the field, are being silenced, censored, and damned because they counter the dominant covid narrative. Just to name a very few of the plethora of them (do research): Virologist, immunologist, and vaccine-insider, Geert Vanden Bossche; Inventor of mRNA technology, Dr. Robert Malone; Molecular neuroendocrinologist, Dr. Aditi Bhargava. Meanwhile you want to declare yourselves the "Board of Health"! For two years we have endured "going-along-to-get-along", "the tale of the noble lie", and disaster capitalism, and this at the very least. The scientific process is being circumvented, and what we have going on is a serious crime against humanity. According to the Nuremberg Code

we are not to be subjected to experimental medical procedures, nor are we to be coerced into them. What else would one call the forced wearing of a mask and the daily bombardment and bribery to take an EUA "vaccine"? If the people truly have a say, then a good politician would accept their job done (the existence of a new virus made known, vaccines made readily available IF the people want them; masks can be worn IF people want them). Now let the people decide
