Masks don't work. I have had COVID despite wearing a mask. Other members, several members of my family have had it also. Masks are uncomfortable to wear, hard to have a conversation with and most importantly hard for children to understand and learn when their teachers mouths are covered. My daughters grades have plummeted this year. She's never had an F in any of her classes and currently has 2 on her progress report released today. This is a huge comeback from the 5 she had up until 2 weeks ago when we started taking her to a tutor. This mandate has caused a number of financial burdens for my family. The tutoring, \$160 a week for 2 hours, my pay has been down more than \$1000 per month because people have been scared into their homes and not conducting business as before. Financial strains are secondary to the mental health issues, depression and anxiety almost everyone I know are dealing with. It's been nearly two years and we're no closer to this "pandemic" ending than we were when it first started. There seems to be no end in sight. I've lived in Charles County for 85% of my life and never have I thought of relocating as much as I have in the past year. I pay almost \$9k per year on my property taxes. I will gladly follow my friends and neighbors out of here to a town where we have rights as citizens and are not forced into tyranny, forced rules and regulations to wear masks. We are suffering and as Americans we should all have the right to choose- just as others have their right to choose for various things. Vaccinated or not-

the virus is transmissible and we all need to work together to hear out the voices of those who have a different opinion. This hopefully leads to happier citizens and a community that is able to start getting back to normalcy. Thank you, Jessica Calomeris La Plata, MD
