The face covering mandate needs to be lifted permanently. It goes against anyone's freedom of choice first and foremost. And I have COPD and already have trouble breathing and having to spend any time in an enclosed area is not only difficult but dangerous, this affects people who suffer from asthma as well. And the mandates for schools is one of the worst. Kids are more likely to get sick wearing face covering all day, with sweat and saliva being a breeding ground for bacteria than they are from not wearing them and their chances of catching COVID. Read the data and science to back it up. Not to mention the huge educational deficit they suffer because of them. Part of learning is seeing facial expression and these children have already lost enough of their education from missing an entire year of school due to the shutdown that they will never make up and will affect them forever, mentally and emotionally. Enough is enough.
