The vaccine protects the people who have the vaccine. Masks protect people who wear the masks. The vaccine and the mask do not protect other people, there have been studies that have shown both to be factual. If someone does not want to wear a mask and does not want to protect themselves they should not be forced to. This isn't about Covid this is about everyone's personal freedom and choosing what they want to do. The only person it effects is themselves. If someone is so afraid of people not wearing masks out and about they have many options including store pick up grocery delivery to their house to where they are not comfortable being around people who do not wear masks they do not have to be around them.
