There is no doubt Covid-19 has taken a tragic toll on everyone, but we cannot continue to live in fear! At one point, people won't be able to fight off the common cold. Many people walk amongst us with other very highly contagious diseases and we never blink an eye about what happens in those situations. State and local governments have to refrain from overstepping their authorities and really listen to their citizens! People should have a choice. Studies are absolutely showing that we are now headed into the endemic phase of Covid and we will learn to live with it as many other diseases that came before this. It truly continues to look more and more like the decisions being made are politically driven and not truly for the citizens. It's hard to really capture an audience when you're not really looking at them. Thank you for allowing people to provide an opportunity to voice their opinion!
