Commissioners Please do not reinstate a mask mandate. There are a number of reasons for this request starting with the fact that they simply do not act as protective barriers against infection of respiratory viruses as numerous studies have found. Viral data from around the world confirm masks don't work as the virus spreads whether communities require their usage or not. On the flip side, masks can also promote infection, especially in small children where they become veritable bacteria factories. They can also be dangerous for users in that they limit the intake of oxygen and increase CO2 levels. It is beyond time to end this theater. If you want to do something useful in fighting COVID infections, work with the hospital to make monoclonal antibodies available 7 days a week. Infusions are not available on weekends. Sadly, the virus doesn't take weekends off.
