We have been at this for almost 2 years now. Anyone that wants a vaccine has had a chance to get one. There are countless other states who do not impose mandates and cases have actually decreased. People have been living complete normal lives for over a year now while Charles County continues to lag behind. Our children are suffering, our economy is suffering, and people are fleeing the county and state. We no longer do most of our shopping in the county due to these unscientific mandates. Our house will be up for sale in the next six months as I do not see any off ramps here. My five year old being forced to wear a mask all day has hurt her both developmentally and emotionally. She cannot learn proper annunciation or see facial expressions. The CDC estimates that 150 million in the US have been infected which makes the death rate .04%. This also means that most of us have some form of immunity whether by vaccination or natural infection. I had an extremely mild case of Covid in January and my antibodies have actually increased after 11 months. It's past time to follow the science and drop the mandates.
