It says the purpose in the title, "TO PREVENT THE SPREAD OF COVID-19" Masks don't work for this purpose. The only randomized control studies that have ever been done on masks show that they don't work: - There's no science to back any of this and particularly no science to back the fact that wearing a mask 24/7 or every waking minute, is health promoting. - There's no data, there's no research that supports that wearing a mask is beneficial. In fact, if you look at the data that's been coming out, it's to the contrary. - Prior to masks becoming a political tool in March 2020, there was never even an attempt at a pretense that masks, let alone bandanas, stop a virus. It's a complete fabrication. The Covid-19 virus is 1/1000 the size of a hair. In other words, you could fit 10,000 (1,000^2) viruses between square fibers in a cloth face mask. - If all you had to do to stop a virus is hold a tissue paper to your face, our ancestors would have learned this centuries ago and your grandmother would have taught you this. But she didn't because it's completely false. - Viruses easily pass through masks as tiny .12 micron particles sneaking easily through the mask and around the mask. Even the very best medical masks (N92) cannot screen out, cannot protect, from this type of small particle virus. - The atmosphere and the whole air fluidity is filled with viruses. We have it around us all the time. You can't mask that away. - This

whole thing is absurd, and we'll remember it for sure come time to vote for NEW commissioners. We're not stupid and we can see this for what it is: A TYRANNICAL POWER TRIP.
