I wrote an extensive letter to the board yesterday regarding the subject of a potential mask mandate renewal. I hope you all read it. After I sent it, new evidence proving masks don't work came again from our very own Dr. Abney. Dr. Abney recommended a mask mandate for all indoor locations in Charles County; presumably because they work. Then last night, Charles County schools were shutdown for a week based on her recommendation. All of the teachers, support staff, and children are fully masked in school. If masks work to protect an individual from possible COVID exposure, why shut the schools down even with an increase in positive cases. We were told that mask is protecting everyone! It's because they don't! Please stop the overbearing legislation. Every scientific study around the world proves that kids are safe in schools. The Governor, the CDC, and the President of the United States is against the shutting down of schools and yet here we are again. Our children will once again suffer and fall behind children around the world with virtual learning all on the recommendation of Dr. Abney. But masks work and we must all mask up elsewhere; but it's too dangerous to have our masked kids and teachers in schools. Stop the madness, please!
