In light of new data I am still opposed to a mask mandate. We keep seeing number of cases. Data shows our mandate has not been effective to prevent spread yet it affects businesses by driving people to shop in other counties. It creates panic over a virus that is now presenting with mild symptoms and extremely low death rates. There is also no consideration of those who have already had the virus and have natural immunity. Vax mandates have driven people from their jobs and that is why hospitals are concerned. Can we look at the actual data and come up with real solutions instead of focusing on a ridiculous mask mandate that is not doing anything except to stoke fear and have our children breathe in all sorts of germs living on their masks.
