I want to know how many staff members the hospital is short due to Letting go of the nurses because they refuse to get the shot which is also causing the shortage of staff. This variant also seems to be not as life threatening as the first so why arent we just telling people if you have mild symptoms then there is no need for testing just stay home till your symptoms are gone? it sounds like the hospital is overcome with people with mild symptoms or they just want to get tested. Why do we need to get tested? Again if your sick stay home unless you have serious problems breathing or your symptoms get worse. We have other neighboring counties that do not require masks and their numbers dont seem to be as bad as Charles County and PG county where we have been requiring masks, only recently have they lifted the mask but I think going back to the masks is not going to prevent the spread of this variant, it will only give people a false sense of security.
