There are those of us in the community that cannot wear a mask over their nose, due to other health conditions.

Our DRs advice that when we have difficulty to wear below the nose. While the mask are proofing ineffective for the transmission, know that one policy doesnt fit all. We refuse to be kept at home due these unlawful mandates. I have already had the virus jan 2021. My natural immunity will work better to preventing it again and/ or fighting it per my doctors counsel. The illness is real & can be serious, but those with health issues should exercise measures to prevent. I trust in Gods natural substances, vitamins & foods to keep immune systems working. So

please stop treating everyone as the same..like cattle or lemming. We are not the villains..we want to be able to breathe again & live our lives. Not in fear, but in faith this will pass.

Appreciate your consideration in hearing all views & know there is more to science than is being presented by the government.
