

Mask Asphyxiation Disease "M.A.D." now sweeping across America and the World

(Natural News) Hypercapnia occurs when CO₂ levels become elevated in the body. This happens when we rebreathe the gaseous waste air coming out of our mouths and noses, imposing harmful and dangerous effects on the mind and body. Rebreathing CO₂ increases your blood pressure and leads to rapid heart rate, chest pain, confusion, twitches, headaches, fatigue, panic attacks and mass formation psychosis. Once this becomes perpetual, organ damage and asphyxiation probability increases. About two hundred million Americans are suffering from this relatively new syndrome resulting from being deprived of proper amounts of oxygen. It's slow suffocation, and the Covid masks are to blame for all of it, whether homemade or N95.

Asphyxiation occurs when carbon dioxide interferes with the oxygenation of tissue. The long-term end result is death. Perpetual mask-wearing zombies are limiting the oxygen that enters the lungs, thus reducing oxygen in their blood, and therefore diminishing the oxygen and nutrients that are carried to body tissues, including the brain. Research reveals that prolonged use of Covid masks, homemade or N95, can cause anywhere from five percent on up to 20 percent loss of oxygen.

M.A.D. to the MAX – Mask Asphyxiation Disease becoming more obvious in public every day

Go out in public right now and you will notice one major concurrent theme that is different from when Covid began. People wearing masks are acting very strange, erratic, anxious, and aggressive. Some people are having panic attacks in stores, fighting to get to products first. Others are having vertigo and double vision attacks while driving, sometimes causing "vaccidents" (from the combination of vaccine and mask side effects).

Concentration is being slowed as well as their reaction time. They are suffering from MAD – Mask Asphyxiation Disease. Road rage is much more common now since the vaccine and mask apocalypse. People's blood chemistry has changed, according to doctors and scientists, which has led to changes in level of consciousness. Oxygen deprivation by prolonged use of Covid masks is causing permanent neurological damage in some people, according to German neurologists.

Carbon dioxide poisoning is common from inadequate ventilation and inadequate breathing caused by every Covid mask

If you are NOT sick, you should NOT be wearing a face mask. We've known this from the beginning, and it was even admitted by Dr. Fraudulent Fauci. Part of convincing a few hundred million Americans to get gene-mutating injections quarterly was first convincing them to make themselves stupid and perpetually paranoid by wearing a Covid mask all day, with nary a break to breathe fresh air. Now MAD (mask psychosis) is sinking in full force, as most of the mask wearers believe they need to wear their mask at all times to be safe from all germs everywhere.

Some of the mask wearers have MAD so bad they wear their mask when they are alone, in the car, walking outside, and even in their own home. Psychosis is when people lose touch with reality, including having delusions, like thinking they need vaccines every 4 months in order to survive the common cold pandemic called Omicron.

M.A.D. is a form of psychosis triggered by physical injury (long-term mask use) and psychological trauma (fake Covid news propaganda). Much like Mad Hatter syndrome from mercury toxicity, more exposure to fake news and oxygen-depriving masks will only worsen the syndrome. You will not read this on mainstream news, ever.
