OWNER'S/DEVELOPER'S CERTIFICATION FOR SEDIMENT AND EROSION CONTROL

Subdivision/Lot Number _____ Tax Map _____ Parcel _____

Grid _____ ADC Map Reference _____

All sediment control practices will be installed and maintained in accordance with the 2011 Maryland Standards and Specifications for Soil Erosion and Sediment Control. Permanent and temporary vegetative stabilization will meet the 2011 Standards and Specifications for Soil Erosion and Sediment Control.

Following initial disturbance or re-disturbance, seeding for permanent or temporary stabilization shall be completed within three (3) calendar days to the surface of all perimeter controls, dikes, swales, ditches, perimeter slopes, and all slopes greater than three (3) horizontal to one (1) vertical (3:1); and seven (7) calendar days for all other disturbed or graded areas of the project site not under active grading. Once vegetation is established, the site shall have 95% groundcover to be considered adequately stabilized.

The permanent driveway or entrance location shall be used as a stabilized construction entrance. A two-inch stone base shall be placed at least 6 inches deep, 30 feet long, and 10 feet wide over approved filter cloth. The entrance shall be top dressed with stone as necessary to prevent tracking of sediment onto public streets or rights-of way.

"I/We hereby certify that all clearing, grading, construction, vegetative stabilization and/or development will be done pursuant to this plan and that any responsible personnel involved in the construction project will have a certificate of attendance at a Maryland Department of the Environment approved training program for the control of erosion and sediment before beginning the project. I/We hereby authorize the right of entry for periodic on-site evaluation by the State of Maryland, Department of the Environment, Compliance Inspectors, Charles County Inspectors, and the representative of the Charles Soil Conservation District."
