While I oppose Creating a Charter Form due to fiscal impacts - creating an Executive and his or her staff, Counsel members with their own staffs I would expect an increase our Property Taxes and too much power in the hands of the Executive, I want to share that this effort with the Charter Board is much more transparent and open than the last effort in the 2014 vote - I watched every meeting then, and am watching every meeting this time. Especially the services of the County Media Services Department, quickly posting the meetings for Download, organized archiving and allowing E Comments like this - and Virtual participation for public comments, That is AWESOME !
