After only 3 witnesses that all spoke in support of An Executive - One expert witness, The Executive from Hartford County is under investigation for wiretapping the Counsel members and the business community electronic communications. It is exactly this kind of concerns citizens have of a TOO powerful Executive. Absolute power corrupts absolutely.

At least with code home rule and a Board of Commissioners there appears to be a balance of power of the elected public servants even though we do not have a plurality of parties yet. This Charter Board has the power to abolish this effort. The Commissioners no longer have a say in your actions. Do the right thing, and make a movement to abolish the Charter board effective immediately, put it up for a VOTE so we will have a record of this evidence when Charter Fails yet again.

Give Charles county at least one election in 2026 where the districts can actually elect their own commissioner - THEN, Citizens might support growing government, and move for a vote in 2028 which would be honorable. Your time and energies are valuable, put an end to this obvious plan to shut down District representation.
