I support the Watershed Conservation District as it is. We need its lower density to keep Mattawoman Creek from falling over the "tipping point" and to conserve the headwaters of the Port Tobacco River. The WCD is curtailing the loss of rural character and maintaining recreational and tourism resources. It is helping to stop wasting money to service sprawl development so taxes can better support education, emergency services, and more. The WCD is reducing crowding, & bringing better schools, reducing future traffic, and ensuring a sufficient water supply all key to sustaining current commercial enterprises attracting supportive businesses, and adding to the quality of life for the residents.
