I am very concerned about the proposed increase to the small airport near several schools. This proposal means double the number of airplanes flying over our children's heads as they're trying to learn, and as these small piston-engine aircraft are powered by leaded avgas, double the amount of lead we are exposing our children to every day. In October the EPA made an Endangerment Finding that lead emissions from these aircraft may "be anticipated to endanger public health and welfare," yet our county commissioners are planning to expand rather than restrict this endangerment to our Matthew Henson and JC Parks students. Please rethink the idea of expanding at this time.
