

June 17th, Commissioner Patterson asked that a stop payment be made on a \$250 check to the CC Juneteenth Foundation because no signage of his sponsorship.

April 4th, we did receive a form and commitment of a \$250 donation. However, we did not receive said funds. However, Commissioner Patterson showed up with family including Del. Edit Patterson. 10-15 mins earlier a unknown photographer showed up and said she was a guest of Commissioner Patterson. Of course, Commissioner Patterson shows up with his normal who is always with him for some unknown reason.

May 7th, we received an email from Anita Swann stating the check would be mailed. The CC Juneteenth Foundation never received payment. In fact, was on Ms. Tomia Woods desk per email.

Additionally, even though Commissioner Patterson selected the level one sponsorship package that only included recognition on social media last year, we kindly in a good faith effort added him to additional signage at the event because of our relationship with him.

This year, even though we did not receive any funds from Commissioner Patterson, in the same spirit as last year we honored him at the stadium and gave him the opportunity to address the guests on the microphone, along with Commissioners Stewart and Collins, whose donations were fully received well before the event.

So, it's unfortunate and yet I'm not surprised to see Commissioner Patterson void the donation of taxpayer dollars to our nonprofit which supports Charles County students seeking to pay for college because he believes we should have given him more recognition.

Last year, 5 students from Commissioner Patterson received a check of \$750 (St. Charles, Thomas Stone High Schools). Commissioner Patterson cheated special needs students while not showing up in the classroom. I assume he will do the same as an employee of DCPS. However, Dr. Lewis D. Ferebee is the Chancellor of DC Public Schools. Is a good friend and I have personally spoke with him so that he knows what type of person he is getting.

In closing to refuse fund scholarships graduating high school students who need funds is lowest of the lowest. During the next election cycle so help me God every citizen will read the email exchange which is on Charles County Gov.t server.
