I am the president of INMAN Utilities. As you should know by now our system (pipes are corroding and deteriorating)is failing rapidly. In the last 4 months we have had 6 leaks, and we paid out over \$11,000 and still have one outstanding bill to come in to repair the road that had to be dug up with one of the repairs. Our funds are dwindling rapidly. With winter and freezing temperatures coming, Mr. Slifka (our repair man) has told us he expects big problems! We have been working towards this goal for many years. Anything the county requested from us was supplied as needed within the requested time frame. There have been so many setbacks; multiple requests for the same things, scheduling issues, approvals, COVID etc. Still 10 years seems like an outrages time frame for any project. Not to mention the rising cost of this project. The price has risen considerably over the years. With the dwindling of our bank account for the repairs, we fear what will happen if something major goes wrong with our system prior to the

completion of this project. We MUST have this new infrastructure as soon as possible. Anything that can be done to expedite this project will be greatly appreciated.
