The Maryland Airport has been in the county for a very long time. The Airport has trained many pilots and is a place we call home. The aviation industry is seeing a huge shortage in Pilots, Mechanics, Skilled Trades, Instructors, Machinists, etc. The land around the airport would support such needs and at the same time create good paying jobs for the county citizens. Lets not forget the taxes the county would earn from new businesses in the county. All this would be beneficial for everyone in the county. The taxes earned would pay for better roads, schools, and services. I live very close to the airport and consider it an integral part of the community. Now is the time to allow the western part of charles county to become a business hub. There is alot of talk regarding the Mattowoman creek. I can tell you, I have personally seen the storm water management at the airport and would think any development around the airport would further better the water quality of the Mattowoman, just as the storm water management at the airport has. The lands around the airport need to be developed to allow the county to thrive both economically and environmentally.
