The proposed amendment -- Would greatly increase the exposure of school children in the area to lead pollution. There is no safe level of lead in the human body, and children are particularly vulnerable. Would change 583 acres protected for their environmental sensitivity into industrial and airport use. This would greatly increase the amount of impervious surface, carrying more sediment into Mattawoman Creek at a higher speed, at a higher temperature, and threatening living resources in the Creek. Would weaken the Watershed Conservation District, which the County put in place to protect Mattawoman Creek in response to an urgent report issued by an Inter-Agency Task Force of the State of Maryland and the federal government, warning about paving any more of the

Mattawoman Watershed. This should not be approved and I will not support a politician who thinks this is a good idea; I will remember!
