My 95 year old father-in-law lives in the development that will be served with the new proposed water line. The community has been working with Planning and Growth Management to get this water system installed for a very long time. I don't recall exactly how long, I believe it started in 2014, 7 years ago. There have been multiple petitions signed by the community, multiple promises by the County Planning and Growth department, a couple of briefings to the Commissioners, and several public meetings such as this. It seems as though it is impossible to get all the tasks done, blocks checked, approvals given to bring this project to completion. Just last May the Community was promised that construction would start very soon, now we need a hearing and some other things done before we can get to construction. This is just the latest in a string of commitments made by the County staff that all have not been met. The project is desperately needed by the community. I request that the Commissioners approve this project immediately,

establish this project as a high priority for the Commissioners, direct staff staff to expedite completion, require the staff to return to the commissioners with a schedule for completion and direct the County staff to immediately report to the Commissioners any deviation from that schedule with their plan to mitigate the delay. I also suggest that the Commissioners establish a review process on this project and possibly others with similar long delays and broken promises that would look at what went wrong that it took so long and why staff was unable to keep their commitments, in the expectation that lessons learned would be applied to similar projects in the future.
