Please vote against the amendment to remove the Water Conservation District that protects the Mattawoman Creek Watershed land surrounding the airport. I don't live in this area, but I understand the Amendment will allow the large expansion of an airport whose propeller planes use leaded gas that will pollute local communities and will pose a threat to a nationally recognized bass fishing habitat that drives local ecotourism. This Amendment also would fragment forest and wildlife corridors in an area with documented biodiversity. I understand that climate change in this region has caused flooding and forest loss. Local governments have a responsibility to consider holistically their contribution to the global climate crisis. In addition, airplanes have a big fossil fuel footprint. The airport expansion, for which the amendment was devised, represents removal of the benefits to the community of the

protections and economic opportunities afforded by this land and transferring it to a private out-of-county owner. The Commissioners at the hearing repeatedly denied any environmental damage from the airport expansion, which is totally inconsistent with the content of the scientific reports which spurred the creation of the Watershed Conservation District.
