The reasons against these restrictions have been effectively stated in the past from the members of reopen charles county. I continue to support the normalizing of our county and removal of these mandates. There should be alot of doubt casted on the decision making and motivations of this governing body in Charles county when you look at there recent legal wrangling that was required by the commission to keep the perpetuation of these county only mandates in effect. Lets try the more relent management options available instead of implementing the same protocols that we started with 2+years ago which haven't yet eradicated or possibly not even altered the normal trajectory of this flu. The only purpose these mandates have fulfilled is confusing of the general public as to what actions they actually can rely on for there own public safety. A greater level of personal responsibility for our own health and safety can produce a greater level of general public health and safety. If you keep yourself healthy and safe because you know your own health status and your own personal measures required to keep yourself safer, then the general population can react more rationally to other peoples requirements. We have learned so much over the last 2 years of this pandemic and much has changed; more understanding to the severity and nature of this flu, and more treatment options and therapies are now available.

Get your county updated on those life saving options instead of double downing on a measure so incidental, controversial, and dividing.
