New medical studies are indicating that mask mandates are ineffective in slowing the spread of viral disease and there are negative health implications from extended mask wearing, especially for asthma and breathing-impaired people like my wife. Continued mandates are causing residents to seek businesses in less restricted counties, resulting in lower income for local businesses. Cloth masks do not stop viral infections and are often worn incorrectly by many people, further reducing any possible benefit. If further mask mandates are implemented, I can assure you that we will be taking our business elsewhere.
