It has been proven by now, the ineffectiveness of wearing masks against Covid-19. Not only do the masks not work but they also cause harm. Masks cause people, especially children, to touch their face more, and touching one's face increases risk of infection. Masks will also interfere with social and emotional development in children as well. Facial expressions are relied upon a lot to learn words and language and masks interfere with that. Study after study shows that masks do not work and they do nothing but produce subconscious anxiety and fear in the masses. That kind of stress has shown to down regulate the immune system. Ultimately people should have the freedom to do what they want to do concerning Covid-19. I can guarantee someone who eats a nutritious diet, exercises regularly and isn't obese will fare far better against this virus or any other than someone who doesn't. Masks need to go. Thank you for your time.
