Science has proven over and over that face coverings do not reduce the spread of the virus and definitely do not keep that teeny tiny virus from going thru whatever is covering the face from being breathed in by the mouth or nose, even if the covering was being worn correctly, sterile of NO germs, used only once, not touched while wearing, etc. Studies have shown that masking children is very detrimental for them, esp ones with special needs. The best a face covering can do is to give a false sense of security. Any person in state/federal office knows that the mask mandates are a farce. We have seen head of states implement the mandate then do not adhere to their own mandate. Not sure why mandates are implemented, is it to get favors, we can guess all day long, but if someone after researching the pros and cons of wearing a face covering and decides they want that false security, they have that choice and if they decide to not wear a mask, they have that choice as well, it is the United States of America, land of the free correct? It's also known, from the beginning of this mess, that being outside one does not need to wear a face mask since you can't catch the virus from someone unless you breathe or sneeze in their face. Give the residents of Charles County their freedom back. Let each person make the decision if they are going to wear a mask and all parents should be the only adult that decides if their child is to wear a mask. We also know that there has never been a way to completely stop any virus. The US of A should not be lied to any

longer. Thank you for taking the time to read my comments even tho I'm sure you have heard it all before. Make Charles County a leader by restarting the trend of giving your constituents their freedom of choice back. Maybe other counties will follow as we get back to living life how we choose with what God has given us from the beginning.
