Several studies have shown negligible effects of mask mandates on the spread of COVID-19. The same surges and falls are occurring across the globe and country regardless of mask mandates or lack thereof. Vaccinations are available and the choice to wear a mask will always be available for those who desire to do so. Encouraging mask wearing and allowing private businesses to require them is fine. Requiring a universal mask mandate by law across the board is nothing but government overreach. It is not the authority of county commissioners to make this decision, which is why the mandate was listed in the first place. Please hear and respect the opinions of the people in your constituency instead of making choices for them out of a desire to look like you are doing the right thing. Please. Thank you for your time
