At this stage in the coronavirus pandemic the public is adequately informed of the dangers associated with the virus, how it is transmitted, who is most vulnerable and how individuals can protect themselves in various situations. Additional spacing in public areas, aggressive hand cleaning, staying home when feeling bad, keeping extra space during personal conversations, easy access to virus testing, vaccinations for those who choose them, wearing masks for those who feel that is necessary, recently released drug treatments etc. all have combined to create conditions where Charles County citizens are adequately informed and protected from the virus and a forced mask mandate is unnecessary and overly aggressive at this time. Additionally, the latest Omicron variant has turned out to be less of a threat than initially thought and certainly does not warrant a forced mask mandate. I oppose the mask mandate and consider it unwarranted, excessive and ill advised.
