Please stop making mandates that are not supported by medical data. You need to present the randomized, controlled medical studies that have concluded that face coverings in a community setting are effective in controlling the spread of COVID-19 that you are using to enact this policy. Otherwise you are simply pandering to a vocal political faction and not making reasonable public health policy. The continued restrictions, inconveniences, public shaming etc that stem from the Commissioners' heavy-handed dealing with free citizens must end. We will not continually surrender our freedoms in an atmosphere of fear and coercion. We do not want the Commissioners to keep granting themselves more power and treating us as children who cannot make our own informed choices. The social damage to our children from having to wear masks in school all day and not see anyone's face is far greater than the small risk they have of serious health consequences from the virus. We have always had and always will have viruses among us. It's time to take a more reasonable view of the risks of COVID-19 and allow us to accept more risk in exchange for freedom.
