Businesses will need relief from false accusations and Government harassment. If people file a false complaint or with malicious intent to the health department, then their identities should be made known prior to any enforcement action to the alleged business or churches. This will allow these entities to take legal action in the courts, if necessary, against said person for just compensation in response to any unjust activity that occurred. People still have the right to face their accusers in this country and not be shielded by any alleged attempt at confidentiality. This unnecessary reinstatement of this Mandate should finally make residents consider whether it is time for legislation or a referendum to impose term limits on the elected officials of Charles County, Maryland, allow for recall petitions, and restrict the Government's use of its emergency powers.
